## 1. Our Commitment

360 Park Homes aims to provide a website experience that is accessible, clear and usable for all visitors, including individuals with disabilities or accessibility requirements.

We strive to improve usability and accessibility across the platform wherever reasonably possible.

## 2. Accessibility Features

The platform may include accessibility features such as:

- responsive layouts for different devices;
- readable font sizing and spacing;
- keyboard navigation support;
- image alternative text where appropriate;
- colour contrast considerations;

- clear headings and navigation structures;
- simplified forms and user interactions.

Accessibility features may continue to evolve as the platform develops.

### **3. Ongoing Improvements**

360 Park Homes is committed to continually reviewing and improving website accessibility.

We may periodically update design elements, navigation systems, content structures or technical functionality to improve accessibility and usability standards.

### **4. Third-Party Content**

Some areas of the website may rely on third-party tools, plugins, integrations or embedded content.

While we aim to work with accessible technologies wherever possible, we cannot guarantee the accessibility compliance of third-party services outside our direct control.

### **5. Compatibility**

The platform is intended to function across modern web browsers, mobile devices and commonly used operating systems.

Users may experience differences in functionality depending on browser settings, assistive technologies or third-party software configurations.

### **6. Reporting Accessibility Issues**

If users experience accessibility difficulties or identify areas that could be improved, we encourage feedback.

Where reasonably possible, we will review reported issues and consider appropriate improvements.

## **7. Enforcement & Feedback**

Accessibility feedback helps us improve the overall platform experience.

We welcome constructive feedback relating to:

- navigation difficulties;
- readability issues;
- technical accessibility barriers;
- compatibility concerns;
- assistive technology issues.

Not all requested changes may be immediately possible, but all reasonable feedback will be considered.
